

At least 1800 Syrian Citizens lost their lives because they didn't arrive to the hospital

Special report about injuries and patients who were killed because of besiege and prevented drug

Syrian Government is of the few remaining government in the world that prevent the work of relief organizations on its territory, not just human rights organizations and international media, but even relief organization that has nothing to do with political reality.

Syrian Government not just settled with this systematic act on wounded and patients' rights, but they make Government troops and security forces to complete this ring on the ground, and imposed besiege on the patients, violating all related international laws and should be taking into accounts by all parties.

We don't want to point out in this report about the systematic aggressive method followed by Syrian Government inside governmental hospitals which lot of them turned to security centers and places of torturing patients, and in some cases execute them, we will not talk about doctors that Government troops killed and arrested, we will deal with this issues later in other reports, but we would like to notify that we have statistics with name figure out the kill of at least 92 physicians with different specializations and the arrest of at least 750 physician, still in prisons to the time we make this report, not to mention that at least 52 paramedics including 23 for Syrian Red Crescent, and the arrest of 17 other from SRC. Government forces also killed at least 66 pharmacists, most of them killed while contributing in relief activity.

Since the beginning of the Syrian Revolution at least 1800 citizens lost their life, cause government and security forces prevented them to arrive to the hospital, which led to slow and painful death.

Reports indicate that the most important disease which led to death because of besieged and prevented drug are:

Kidneyfailure: patient needs to blood analysis tests

Cancer and malignant tumors: where patient needs intervals chemical dose

Hemophilia: where plasma should be available to stop bleeding

Bronchial asthma : need bronchodilator

Heart disease

According to Customary IHL:

Rule 53. The use of starvation of the civilian population as a method of warfare is prohibited.

Rule 54. Attacking, destroying, removing or rendering useless objects indispensable to the survival of the civilian population is prohibited.

Rule 55. The parties to the conflict must allow and facilitate rapid and unimpeded passage of humanitarian relief for civilians in need, which is impartial in character and conducted without any adverse distinction, subject to their right of control.

Rule 56. The parties to the conflict must ensure the freedom of movement of authorized humanitarian relief personnel essential to the exercise of their functions. Only in case of imperative military necessity may their movements be temporarily restricted.

Syrian Network for Human Rights condemn this terrible besiege and hold Syrian Government its responsibility, which considered as war crime, and it is Systematic punishment policy in various area , which also crime against humanity.

International community institute, particularly security council to move quickly to save thousands lives of besieged Syrian People, and to upgrade to their legal and ethical responsibility. There are also great responsibility lies on International Red Cross, which didn't amount to 10% of Syrian Humanitarian Catastrophe level, especially in the besieged areas.

Report Details:

Child Kilani Ahmad Alhamad: 14 years old, from DaraaAlmahata, Died due to stroke, where government forces prevented him to enter hospital in 1/10/2012

The Four Geneva Convention for 1949 and all annexes stated the provision of the protection of human rights dignity for all human beings in all circumstances and times, and all the necessary procedures without prejudice to stop the wounded, handicapped and patient's suffering whether they participated in any armed conflicts or were civilians.

The above mentioned agreements clearly indicate the need to provide appropriate and adequate treatment for all injured by medical staff in hospitals and fixed and transmitted clinics, regardless of the orientation of those who control those hospitals and clinics.

On the other hand, it looks that's what's happened in Syria in the last few months of the Syrian uprising indicate a blatant contradiction with Geneva Conventions, where Syrian Government hold the whole responsibility on all cases that led to kill wounded or patient, cause of prevention the access to treatment, and hold the responsibility of disabilities and chronic diseases too, in addition to all sequences and implications reactions on it, all of that considered as crimes against humanity where international community represented by Security Council and United Nations must move and protect Syrian People from them.
