92 victims including 34 children, nine women, and three combatants

The following link contains details and information about the victims of 8/2/2014
95 civilians including 10 children and 18 women

Conclusions:
1- SNHR affirms that the shelling using explosive barrels is an indiscriminate shelling that targeted armless civilians, thus the government forces and militias have violated the articles of the international law for human rights which guarantee the right to live, furthermore these violation were pretreated during a non-international armed conflict which can be classified as war crimes.
2- The random attacks committed by the government forces are considered violations of the norms of the international humanitarian law given that the government forces attacked residential areas rather than a specific military target.
3- These attacks, especially air strikes, have caused casual losses whether it was killing civilian victims, wounding them, or causing severe damage to civilian properties. There are strong indicators shows that the damage was deeply severe compared to the expected military advantage.
4- The magnitude of this wide systematic frequent shelling, the level of its excessive strength, its military nature, and the coordinated approach of the attacks must be based on high orders, and a state policy.

Recommendations:
The Security Council
1- To protect the civilians in Syria from killing and shoulder its moral and historical responsibility.
2- Take further action because the Syrian government, as usual, didn’t commit to the last resolution 2193 and undermined it.
